Full-Stack Developer with hands-on experience building and deploying modern web applications using React, Next.js, Node.js, and API-driven architectures. Experienced in developing production-ready CMS platforms, interactive corporate websites, data analytics applications, e-commerce experiences, and business management systems. Strong focus on responsive UI animations, scalable backend systems, and end-to-end project delivery.

EDUCATION

Atmiya University - Rajkot, Gujrat.

Aug 2022 – May 2026

Bachelor of Technology in Computer Engineering - 7.72 CGPA

- Focused learning programming fundamentals , understanding system designing concepts and worked on web development projects.

EXPERIENCE

Full Stack Developer - Nexvity Infotech Pvt. Ltd.

Apr 2026 – Present

Internship

- Migrated and redesigned projects onto a modern Next.js stack, improving load performance and maintainability.
- Built and shipped the company's website CMS on Next.js with a custom NextAPI layer, enabling real-time content management for the marketing team.
- Designed animated, interactive frontend experiences using GSAP, boosting on-site engagement and time-on-page.
- Owned end-to-end delivery: initiated project scope, managed development sprints, and performed unit testing before release.
- Maintained production stability and performance sustainability across live deployments, coordinating fixes with minimal downtime.
- Handled the complete lifecycle from project initialization through to production delivery for client sites.

PROJECTS

Nexvity Infotech CMS ↗

Next.js · Node.js · MongoDB · GSAP · Cloudinary

- Developed company website with modern UI implementation and complete Backend architecture with RBAC dashboard.
- Implemented backend API integration and database-driven content management using Next.js and MongoDB.
- Integrated Cloudinary for optimized media storage and delivery, improving load performance across the website.
- Contributed to production deployment and continuous performance improvements alongside GSAP-driven interactive experiences.

Logicnest Technology ↗

Next.js · Three.js · GSAP

- Developed an interactive corporate website focused on immersive visual presentation and modern digital experiences.
- Implemented custom service-filtering interfaces and animated page transitions to improve content discovery and navigation.
- Integrated Three.js-based visual experiences with GSAP-driven animations and interaction effects.
- Built responsive layouts while balancing animation quality, usability, and frontend performance.

Neo Surgical Portal ↗

Bootstrap · PHP · JQuery

- Secure business portal for surgical equipment inventory, order tracking, and sales reporting with motion-driven data views.

SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Next.js, Node.js, Express.js, Python, PHP(Basics)

Frontend & Animation: HTML5, CSS3, TailwindCSS, Bootstrap, GSAP, Framer Motion, Three.js, Responsive Design

Backend & APIs: RESTful APIs, GraphQL, WebSockets, Serverless Functions, CRUD operations.

Databases & Cloud: MongoDB, , Mongoose, AWS, Vercel, Cloudinary, SQL(Basics)

Tools & Practices: GitHub, Figma (UI to Code), Antigravity IDE, Google Ai-studio, Claude Code.

Soft Skills: Communication, Adaptability, Accountability, Team work, Time Management.
